Expected August 2027

Tallahassee, FL

Florida International University

B.A. in Computer Science | GPA: 3.5/4.0 | Cum Laude

August 2026

Miami, FL

EXPERIENCE

Full-Stack Engineering Intern | Caley Insurance | Miami, FL

June 2026 – Aug 2026

- Own six internal applications end to end for 50+ employees across five offices by scoping requirements with agents and office managers, implementing in React/Vite/Node on Supabase and AWS EC2, reviewing pull requests, and shipping multiple production releases per month.
- Replaced manual policyholder outreach with an SMS platform that pushes hundreds of messages per campaign; spreadsheet import, reusable templates, two-way threading, and automatic opt-out tracking keep agents compliant without hand-scrubbing lists.
- Cut 20+ hours of monthly administrative work by automating state-license compliance tracking and employee onboarding/offboarding.
- Turned static marketing pages into a lead channel with quote-intake forms and automated follow-up that routes prospects into the sales pipeline.

Software Engineer Intern | Miami-Dade County CITD | Miami, FL

January 2026 – May 2026

- Built observability models on the Databricks platform with a five-person Agile team (sprint planning, code reviews, stand-ups), turning IT system and operational data into analytical insights for Miami-Dade County's Communications, Information and Technology Department.
- Developed AI/ML prediction models in Python to forecast system behavior and surface trends, supporting data-driven decisions for county IT operations.
- Cleaned, transformed, and analyzed large datasets with Python and SQL in Databricks notebooks, and presented findings and recommendations to county stakeholders and mentors.

IT & Audiovisual Technician | Florida International University | Miami, FL

April 2024 – May 2026
