EDUCATION

Florida State University

Master of Science in Information Technology
August 2026 – July 2027

Expected Graduation: July 2027

Tallahassee, FL

Florida International University

Bachelor of Arts in Computer Science

GPA: 3.5 | Cum Laude

Expected Graduation: Summer 2026

Miami, FL

Relevant Coursework: Systems Programming, Software engineering 1, Data Structures, Operating Systems

EXPERIENCE

Full Stack Engineer, Intern

Caley Insurance

June 2026 – Present

Miami, FL

- Ship features end-to-end across a React/Vite/Tailwind frontend, Node.js API layer, Supabase (PostgreSQL + Edge Functions), and AWS EC2 infrastructure. Own each change from spec through PR to production deploy.
- Built internal tools that removed recurring manual work: an automated SMS pipeline for policyholder outreach, a compliance system tracking state licensing requirements, and agent onboarding/offboarding workflows that provision and revoke access on day one and last day.
- Design and deploy customer-facing lead-generation surfaces (landing pages, quote-intake forms, follow-up flows) that feed the agency's sales pipeline.

Project Lead Full Stack Engineer

INIT Build

January 2026 – May 2026

Miami, FL

- Directed a cross-functional team of 10 developers across a nine-week lifecycle, managing sprint planning, milestone tracking, and final production deployment.
- Oversaw code review processes and enforced best practices, maintaining codebase quality and reducing integration conflicts across parallel workstreams.
- Successfully launched the application to 20+ campus users on schedule, coordinating QA testing and deployment pipelines from staging to production.

IT & Audio Visual Technician

Florida International University

April 2024 – Present

Miami, FL

- Managed IT infrastructure, AV systems, and technical support for faculty, staff, and students across the university.
- Configured and maintained AV equipment including audio visual networks, remote conferencing equipment, and integrated control systems.
- Administered Active Directory and deployed hardware/software updates using SCCM.

PROJECTS

PantherAI | Python (Flask), React, JavaScript, Node.js, REST API, Gemini AI API, ChromaDB, OCR, Git

A campus copilot for FIU students.

- Designed a modular Flask backend integrated with the Gemini LLM for search and task management.
- Implemented a responsive React frontend and UI for seamless student interaction.

Real-Time Market Data ETL Pipeline | Python, PostgreSQL, Apache Airflow, Docker, SQL

- Built a production-grade ETL pipeline ingesting real-time market data from external APIs into PostgreSQL.
- Implemented modular ingest, validation, transform, and load layers for reliability and scalability.

CERTIFICATIONS

- **Microsoft Certified:** Azure Fundamentals AZ-900, Azure Data Fundamentals, Power BI – 2025
- **CompTIA:** Security+
- **AWS:** Certified Data Engineer – Associate

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, SQL

Backend & APIs: Flask, FastAPI, Node.js, RESTful API design, authentication, modular backend architecture

Cloud & DevOps: Azure, Docker, Linux, Git, GitHub Actions (CI/CD)
